

Common Symptoms of Kennel Cough

Learn about the different signs to watch out for, as well as the level of severity.

EARLY SYMPTOMS

- Mild cough
- Sneezing
- Snorting

If your dog is showing early symptoms, make sure to monitor them closely for changes.

MILD SYMPTOMS

- Persistent cough
- Discharge of the eyes
- Nasal secretions
- Difficulty breathing

At this stage, it's important to take your dog to an animal doctor as soon as possible.

SEVERE SYMPTOMS

- Constant violent cough
- Loss of appetite
- Lethargy
- Trachea sensitivity
- Fever

At this stage, your dog should be undergoing treatment such as antibiotics.
